Don't Let Congress Pass the TPP!

The Trans-Pacific Partnership (TPP) is a massive international “trade” deal crafted in secret by multinational corporations and big bankers for their own benefit at our expense.

The TPP is much more than a trade deal—it is a corporate power grab that impacts every aspect of our lives. If passed, the TPP would take away environmental protections, decrease the number of jobs & decrease wages, remove food safety laws, curtail internet freedom, inhibit access to lifesaving medicine, spur further financial deregulation and more.
